About McDollibee

The McDollibee app is an easy-to-use ordering platform for Android devices. With the app, users can quickly and conveniently place orders for their favorite food online, all from the comfort of their own home. The app features a user-friendly interface, allowing customers to browse menu items, customize their orders, and pay for their meal all within the app. The McDollibee app is the perfect solution for those looking for a quick and convenient way to enjoy their favorite fastfood meals.

About McDollibee

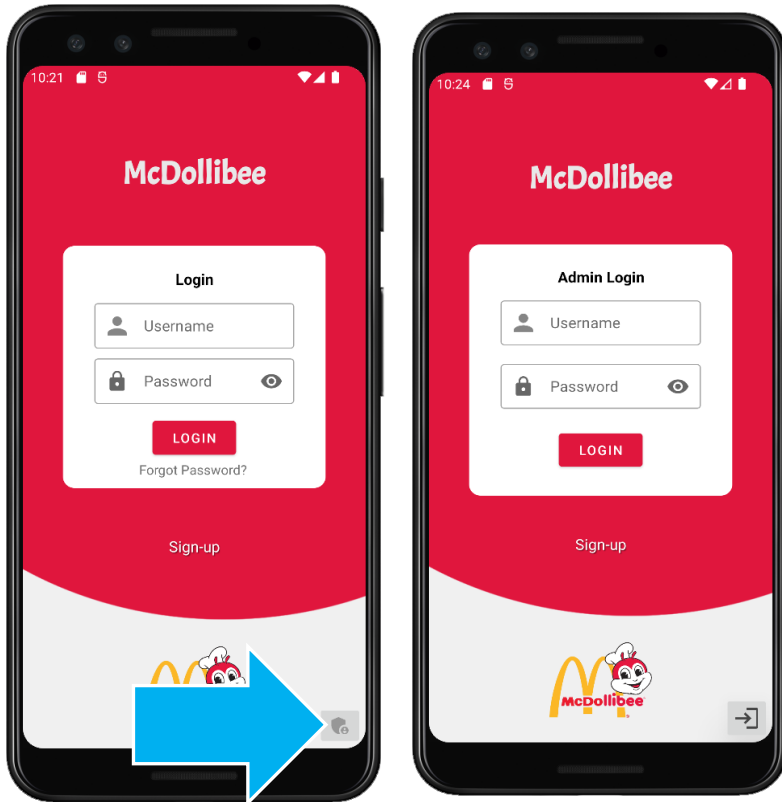

McDollibee app also has admin interface area where the owner or an admin can manage the orders, foods in the menu, costumers, employees, or the admins themselves.

Features

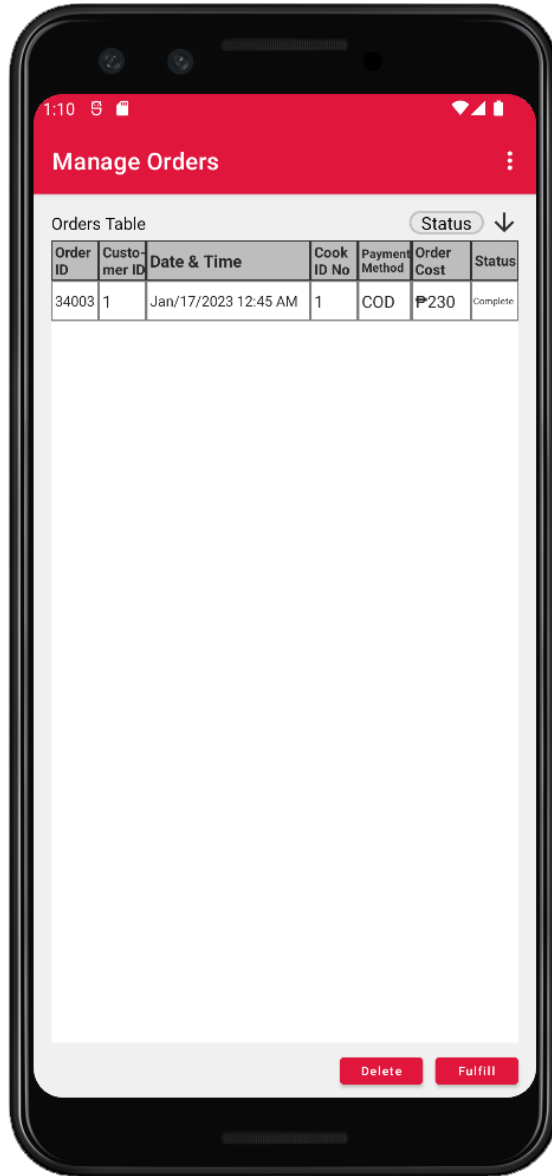

- ✓ Material Design for a beautiful and curvy looks.
- ✓ User- friendly Interface
- ✓ Customization
- ✓ Order Status, Details and History
- ✓ Admin Panel
- ✓ Menu & Order Management

Admin Area

Admin Login

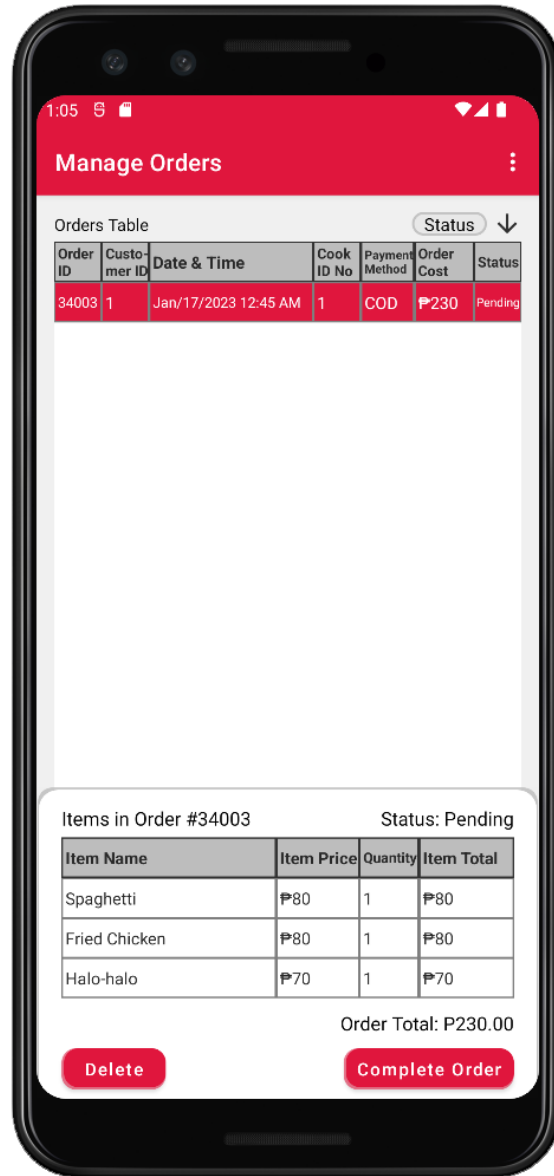

Accessing the admin area can be done by clicking the icon in the lower right corner in the login page.

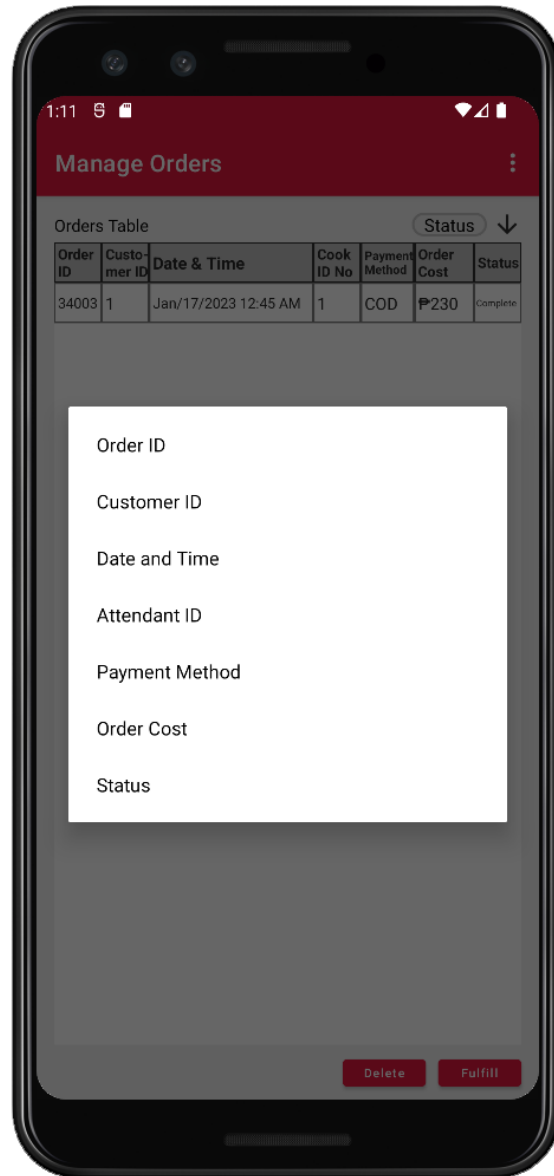

Manage Orders

In this page, the admin can fulfill customer orders. They can also customize as well as cancel or delete orders when necessary.

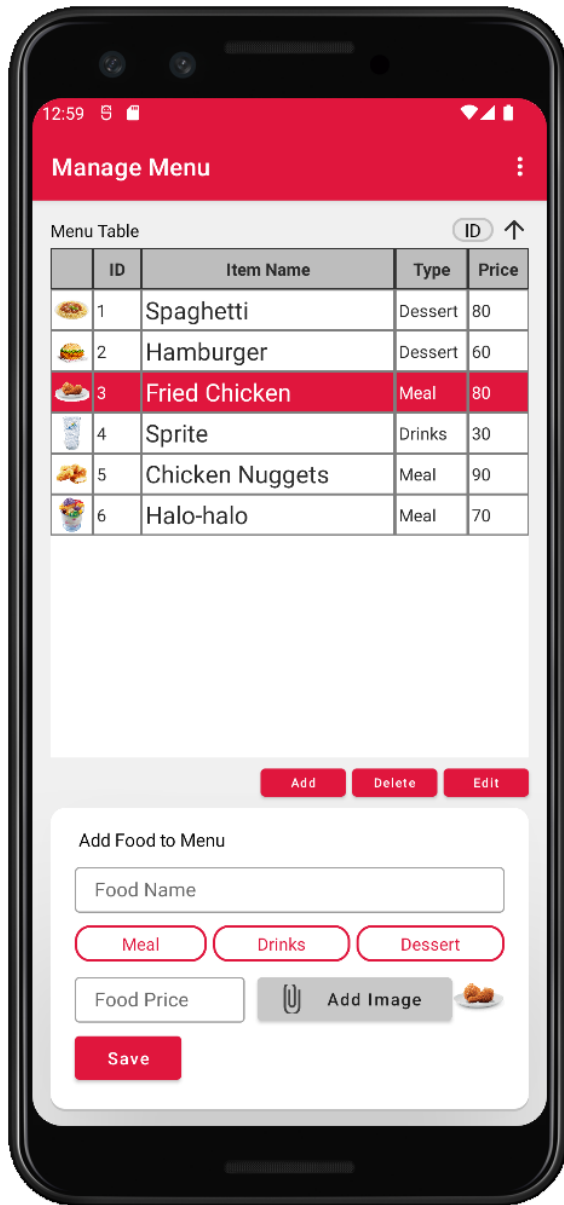

Manage Orders

Once a row has been highlighted, clicking the fulfill button will prompt a bottom dialog that enables the admin to complete an order or delete a specific item of an order.

Manage Orders

There is also a sorting feature throughout the admin area that helps the admin to easily browse the tables and it's data.

Manage Menu

In this page, the admin can add, edit or delete food to the menu.

Once a row has been highlighted, the admin can delete or edit a row in table else the button is disabled.

Manage Users / Admin

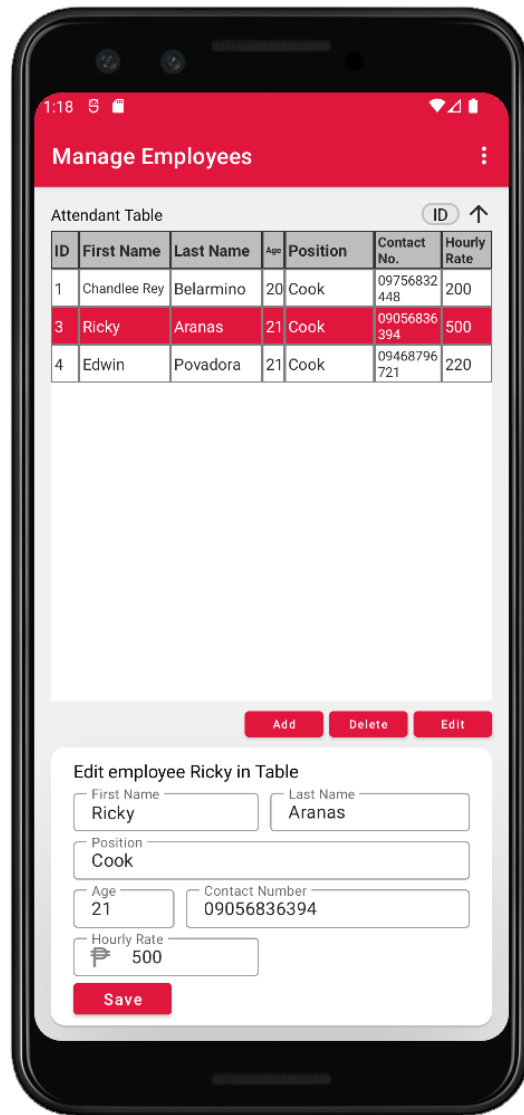

In this page, the admin can add, edit or delete users to the menu.

The admin can also make a user an admin.

Manage Users / Admin

It is also possible to add an admin by manually creating its account.

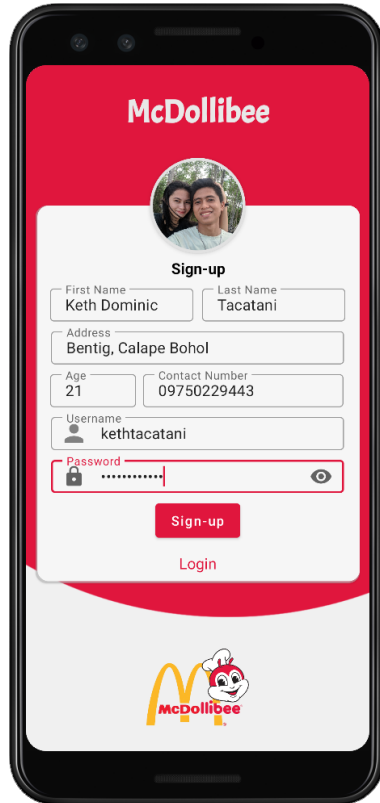

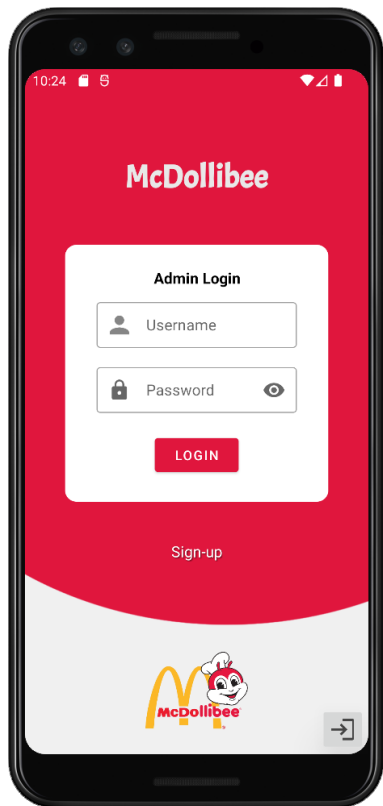

Manage Employees

In this page, the admin can add, edit or delete employees to the menu.

In the example, cooks has been added to the table that will be later used by the order table.

Costumer Area

Login & Sign-up

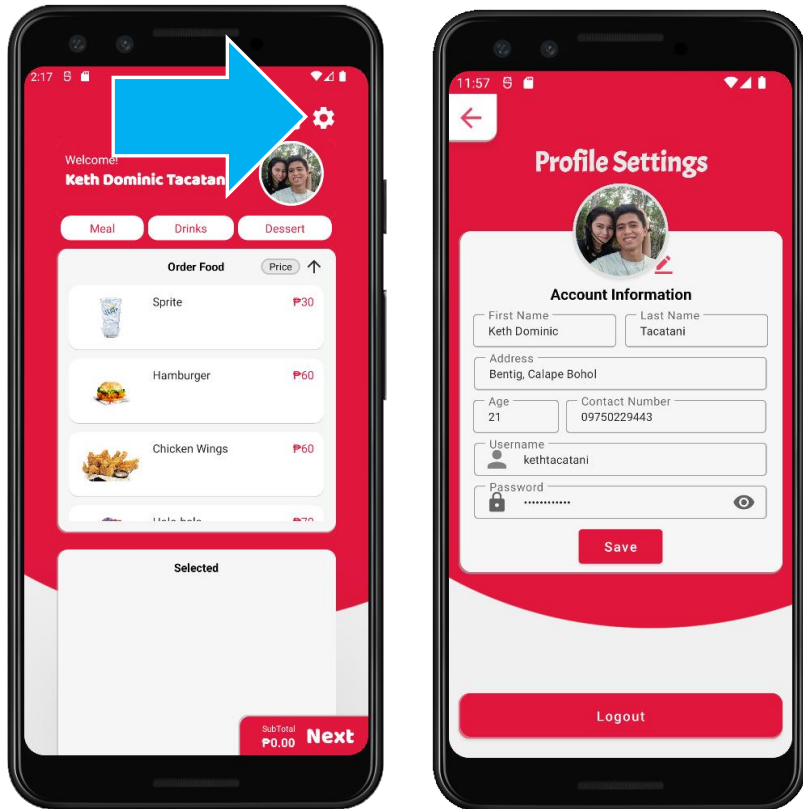

Sign-up: To create an account, users can tap the "Sign Up" button on the app's home screen. They will then be prompted to enter their username, password, and personal information such as name, phone number, and address.

Login & Sign-up

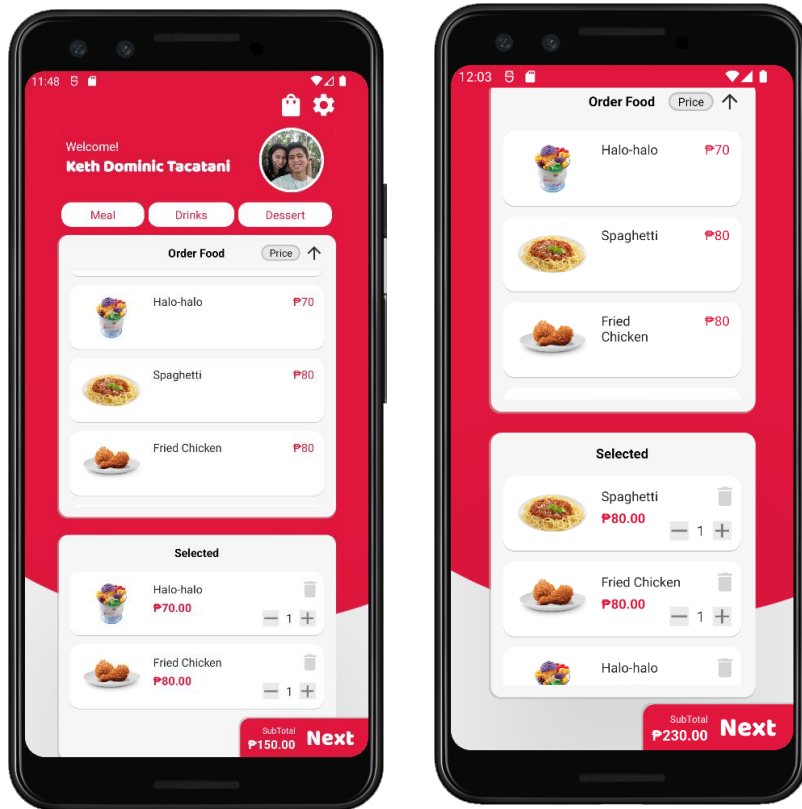

Login: Once the account is created, users can log in to the app by entering their username and password.

Profile Settings

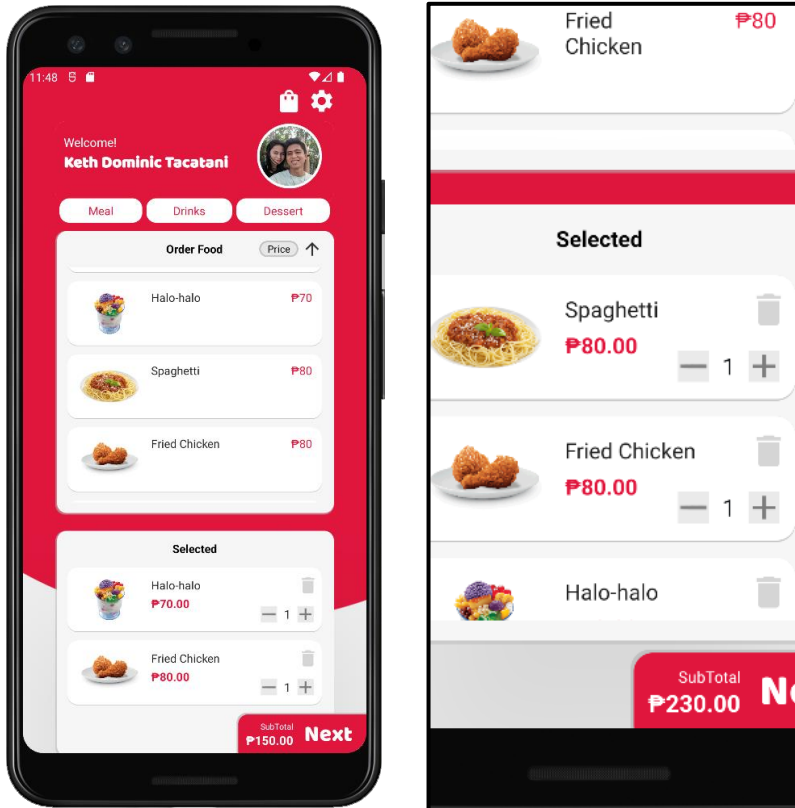

Profile Settings: Users can edit or change their profile settings information by clicking the gear icon on the upper right corner of the app. The log-out button is also located at the bottom part.

Order Food

The user can select food from the “Order Food” menu. They can also sort the menu by clicking the “Meal” “Drinks” “Dessert” buttons as well as sorting from ascending or descending. The selected food will then be inserted in the “Selected” menu below.

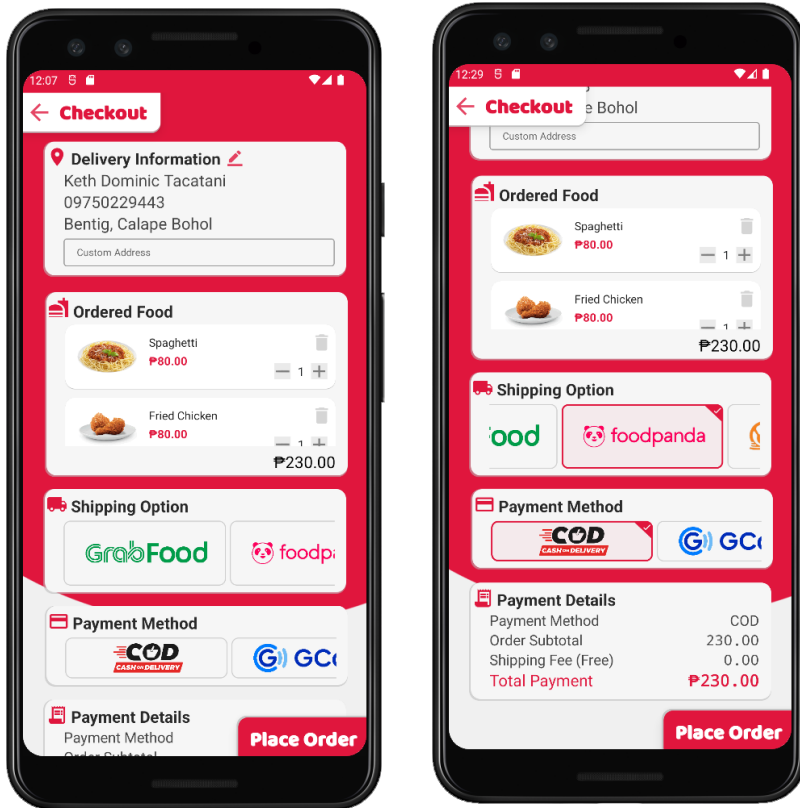

Order Food

The user can also select the quantity of the items being selected and the app will automatically calculate the subtotal of the order

There is also a delete button incase the user changes their mind.

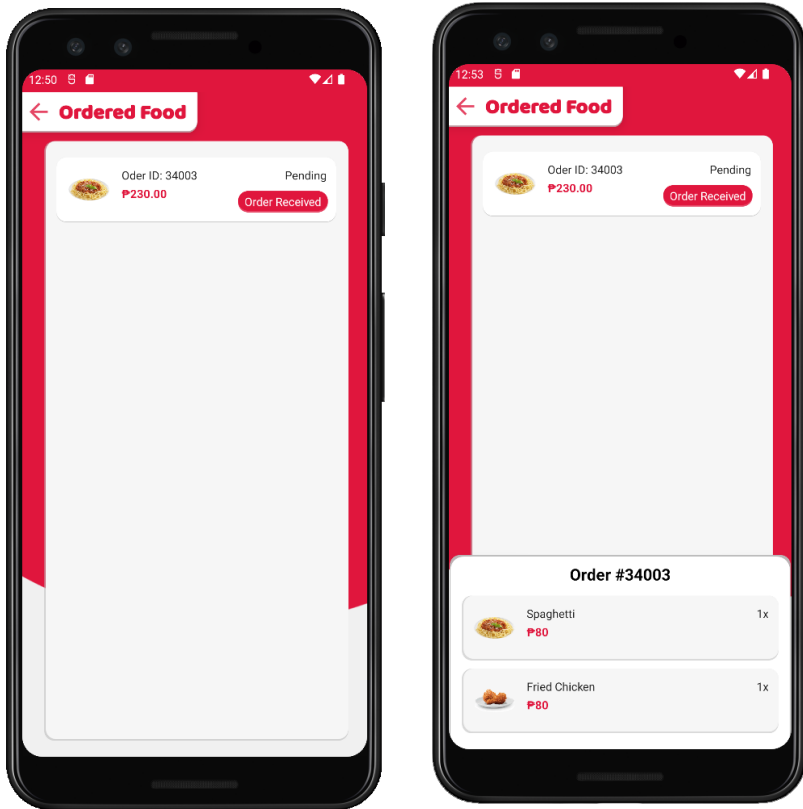

Check-out

After checking out, the user will then check their delivery address, ordered food, shipping details and payment method.

After that, the user can click the place order to proceed.

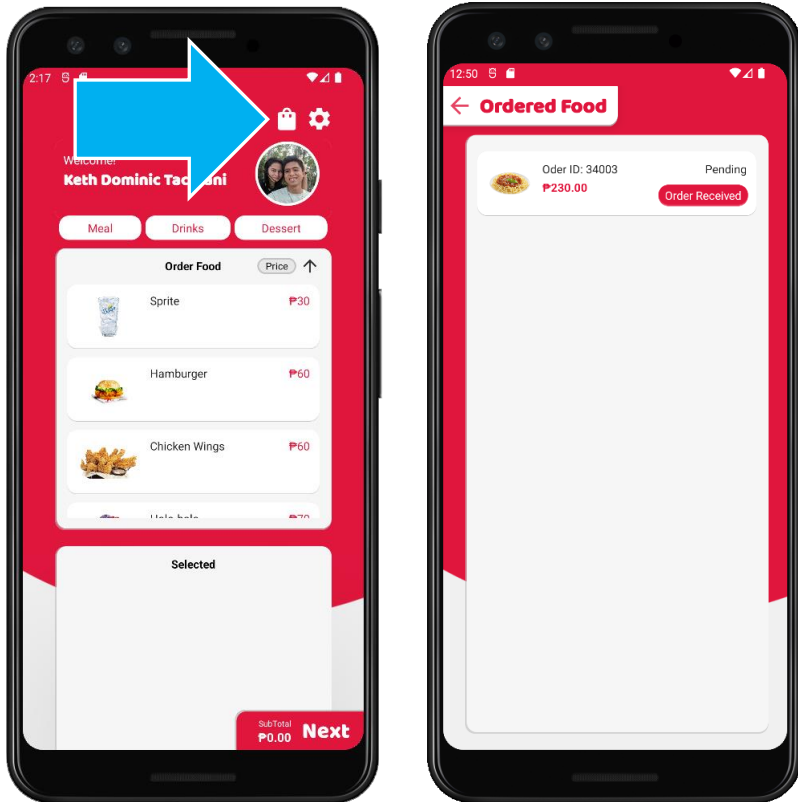

Ordered Foods/History

After placing order, the users will then be prompted to ordered food activity where they can see their order's pending as well as their completed orders.

The user can also see the details of the order.

Ordered Foods/History

The user can also access the same activity through clicking the icon in the upper right corner.

For pending orders that are delivered they can click “order received” button or will be done by the admin.

That's all, thank you;
